Oleksii Podolianchuk

Senior Process Engineer

Summary

Process/Safety Engineer with 8+ years of experiences designing a greenfield and brownfield assists (gas processing plants, gas compression station, LNG). Quite skillful in documenting engineering procedures and processes, in accordance with Russian codes and international standards (The latter include: Pre FEED, FEED, Detailed Design). Multiple experiences of participation in HAZOP, HAZID, SIL classification and etc. Have a great deal of experience in leading workforce to meet deadlines, managing engineering teams, as well as teamwork engineering. Specialized, but maybe a versatile professional, who provides creative solutions to complex problems. Proficient in UniSim software and in possession of a Bachelor’s in Chemical Engineering.

Experience

2015-08 -2019-03

Senior Process Engineer

Sakhalin Energy Investment Company Ltd. (Shell)

Core Responsibilities:

• Provides technical support for a project on the subject "Process" of technical control in terms of technical justification of made decisions from the point of view of safety and compliance with the technical requirements of the Project.
• Participates in the analysis and/or modelling of technological processes with a view to making recommendations for the optimal implementation of the Project.
• Interacts with other disciplines within the project team, to ensure an integrated approach to the design and accounting of assigned technical requirements.
• Analyses the technical design documentation developed by design institutes or specialized organizations for compliance with the requirements of the Project in the discipline "Process".
• Provides the information needed for the Project planning and scheduling, cost estimate, report developed in the course of executing the Project.
• Interacts with the specialists of contractor organizations involved in the execution of the Project on discipline "Process".
• Provides the collection, updating and management of the Project information.
• Maintains the Project documentation (schemes of technological processes, the line list, equipment data, etc.).
• Take decisions to ensure the technical integrity of the Project as part of the discipline "Process".
• Provides recommendations on new technologies and areas of development, as well as to improve the efficiency of existing processes.
• Develops and reviews equipment specifications.
• Gives technical advice and clarifies the standards requirements, communicating these requirements to all parties involved in the Project.

Personal Info

Address
25003 lenora dr, Katy, TX, 77493

Phone
+1 551 248 3810

Skills

Concept Development (PFS/PFD, Philosophy, BDP)

Process modelling & analyses (UniSim)

Process Unit Design (PEFS/P&ID, BDEP)

Process Unit Operations Support (PI data)

Fluid Flow & Flow Assurance (Hydrate, Wax)

Process Safety (HAZOP, HAZID)

Leadership

• Participates in the preparation of contracts that necessary for the execution of the Project.

Assets:
• Onshore Process Facilities (Parson)
• Booster station Onshore Process Facilities (Petrofac)
• Prigorodnoye LNG (WOOD GROUP)
• Lunskaya-A (LUN-A) platform (WOOD GROUP)
• Molikpaq (Piltun-Astokhskaya-A) platform (WOOD GROUP)
• Piltun-Astokhskaya-B platform (WOOD GROUP)

2012-03 - 2015-08

Senior Process Engineer

PJSC "YUZHNIIGIPROGAZ", Ukraine

Core Responsibilities:
• Control of the develop documents such as flow diagrams, P&ID's, equipment sizing, hydraulic calculations, energy requirements, specifications and data sheets during the basic design phase
• Control of the develop RFQ packages, perform technical bid analysis and drawing and document reviews during the detail design phase.
• Provide data analysis during the conceptual design phase of the project using computerized techniques
• Lead the Process Engineering team in developing design scope and ensure that all related deliverables are in compliance with the applicable codes, standards, Project and Corporate requirements and procedures.
• Monitor personal activities and activities the group to meet project schedule and budget
• Advise Project Manager and Process Group Supervisor regarding significant technical, scheduling or cost problems so that timely corrective action can be taken
• Attend and participate in Project Team meetings
• Maintain proficient design calculations and file them properly for future reference
• Demonstrate a positive attitude, ethical conduct and excellent communication skills
• Attend and provide input at P&ID review, HAZOP & HAZID review.

Projects:
• Sakhalin-2, Onshore Process Facilities (Shell), FEED
• Orenburg Gas Processing Plant (Technip), FEED and DD.
• Astrakhan Gas Processing Plant (Technip), DD
• Orenburg Helium Plant facilities (GazProm), MOCs.
• Purovsky processing Plant of the LPG (Novatek), FEED and DD

2009-03 - 2012-03

Process Engineer

PJSC "YUZHNIIGIPROGAZ", Ukraine

Core Responsibilities:
• Preparation of Heat and Mass Balance
• Preparation of Design Basis
• Preparation of PFD, UFD and P&I diagram.
• Equipment sizing – Tanks, Phase separators, Indirect Bath Heater
• Pump, Compressor and Control Valve Sizing.
• Line sizing and Hydraulics Calculations.
• Preparation of Process Datasheet, Process Instrument Datasheet

• Preparation of Line list, Equipment List
• Preparation of Utility summary
• PSV Sizing.

Projects:
• Astrakhan Gas Processing Plant (Technip), FEED
• Sakhalin-2, Onshore Process Facilities (Shell), pre-FEED.
• Amur Gas Processing Plant of Chayandinskoye and Kavenktinskoye fields (GazProm), Cost investigation analyzes and pre-FEED.
• Gas Processing Plant of Samburgskoy (Novatek), FEED.
• Stokman Onshore Process Facilities of LNG (Technip), FEED.
• Orenburg Gas Processing Plant (Technip), MOCs.
• Purovsky processing Plant of the LPG (Novatek), FEED and DD
• Orenburg Helium Plant facilities (Technip), FEED and DD

Education

2008 **Donetsk National Technical University, Ukraine**

• Bachelor in Chemical Engineering - 2008

Courses

2017 Advanced Relief and Flare Systems (AMO404). Shell Netherlands

2016 Multiphase flow (P224). Shell Netherlands

2015 Technical Safety Engineering Foundation Course (TSE 101). Shell Netherlands

2015 HAZOP Leader Training Course. PSN Russia

2015 Liquefied Natural Gas: Understanding the Basic Facts. SEIC Russia

2012 AutoCAD MEP 2012. AutoDESK Russia

2011 AVEVA PDMS 12.1 Equipment and Piping Design, AVEVA Diagrams. AVEVA Hungary
